

## Jiangling Jingma 10-19-Seater Pure Electric Tourist Bus With 300 Kilometers Range

Our Product Introduction

for more products please visit us on [vehicle-automobile.com](http://vehicle-automobile.com)

### Basic Information

- Place of Origin: China
- Brand Name: Fushunt
- Model Number: Jiangling Jingma 10-19-seater pure electric tourist bus transportation reception bus with a range of 300 kilometers, rear-wheel drive automatic transmission
- Minimum Order Quantity: 1 vehicle
- Price: \$50,000-\$60,000Dollar
- Packaging Details: Complete vehicle
- Delivery Time: 5-8 work days
- Payment Terms: T/T
- Supply Ability: 1000 vehicle

### Product Specification

- Air Conditioner: Yes
- Air Conditioning: Yes
- Airconditioning: Yes
- Cruise Control: Yes
- Engine Type: Diesel
- Fuel: Diesel
- Interior: Modern
- Refrigerator: Yes
- Restroom: Yes
- Seating Arrangement: Forward-facing Reclining Seats
- Seating Capacity: 10-19 Seater
- Suspension: Air Ride
- Toilet: Yes
- Windows: Large Viewing Windows
- Highlight: 100km/h Pure Electric Tourist Bus.

### Product Description

#### Jiangling Jingma 10-19-Seater Pure Electric Tourist Bus Transportation Reception Bus With A Range Of 300 Kilometers, Rea

Sure! Here's a segmented description of an electric bus in clear hierarchy:

**Vehicle Type and Purpose:** An electric bus is a type of public transportation vehicle that runs on electric power instead of conventional fuel. Its primary purpose is to provide emission-free and energy-efficient transportation for passengers in urban and intercity settings. Electric buses are designed to reduce air pollution, noise levels, and dependence on fossil fuels, offering a sustainable and eco-friendly transportation solution.

**Body Design and Seating Capacity:** Electric buses are designed with a spacious and comfortable interior to accommodate a large number of passengers. They typically have a longer body length and higher seating capacity compared to traditional

buses. The seating arrangement may vary depending on the model and purpose of the bus, ranging from standard seating to configurations for standing passengers and wheelchair accessibility.

**Electric Drive System and Battery Capacity:** Electric buses are powered by an electric drive system, which consists of an electric motor and a battery pack. The electric motor converts electrical energy from the battery into mechanical power, propelling the bus forward. The battery capacity determines the range of the electric bus, with larger capacity batteries providing longer driving distances. Electric buses can be charged using external charging stations or fast-charging technologies to optimize charging efficiency and convenience.

**Interior Features and Comfort:** Electric buses prioritize passenger comfort and convenience. They are equipped with comfortable seating, air conditioning systems, entertainment facilities, and passenger information displays to enhance the overall travel experience. Some electric buses may also offer wireless charging facilities for electronic devices. Additionally, electric buses can incorporate smart systems such as onboard navigation, voice assistants, and passenger information systems to provide a seamless and user-friendly travel experience.

**Safety and Environmental Features:** Electric buses emphasize safety and environmental performance. They may be equipped with multiple safety features, including airbags, anti-lock braking systems, and vehicle stability control, to ensure passenger safety. The electric propulsion system of electric buses produces zero tailpipe emissions, contributing to improved air quality and reduced environmental pollution.

With the above segmented description, we can clearly understand the type and purpose of an electric bus, its body design and seating capacity, electric drive system and battery capacity, interior features and comfort, as well as safety and environmental features. These descriptions help us comprehend the electric bus as a sustainable, efficient, and comfortable public transportation option that provides convenient, safe, and environmentally friendly travel for passengers.

| Vehicle technical parameters     |                                                   |
|----------------------------------|---------------------------------------------------|
| use                              | Passenger bus, tourist bus, group bus             |
| Body length                      | 5995mm                                            |
| Body width                       | 2280mm                                            |
| Body height                      | 2920mm                                            |
| Vehicle quality                  | 51700kg                                           |
| total mass                       | 8500kg                                            |
| number of seats                  | 10-19                                             |
| Seat form                        | Imitation leather seats                           |
| maximum speed                    | 100km/h                                           |
| Heating system                   | Warm water pipes without insulation               |
